

Setting your KLN GPS for IFR

Bendix-King KLN 89B and KLN 94 GPS navigators are standard factory equipment in our Cessna 172 fleet. This seminar teaches you how to navigate the navigator, finding and loading approaches, starting the approach at various points, monitoring the approach, and executing missed approaches. We will point out how the two units are similar and differ and how you can personal operating procedures can be standardized to accommodate both.

Directions: Pilots who fly in should park in transient parking on the opposite side of the field and expect to walk about 10 minutes (.5 mile) to the Flight Center. Suite 215 is upstairs in the northwest corner. On occasion, rides may be prearranged through San Carlos Aviation and Supply.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
